

RANUA

Summer in Hillatori market square

In the summer, there is what is called “cloudberry exchange”.

At the beginning of the summer, the price of cloudberry is set in Hillatori. Thousands of kilos of cloudberry and other berries are bought and sold there each year. The berry pickers sell their berries directly to customers or to intermediaries at the market. During the peak season, usually in mid-July, buyers and sellers from all over Finland arrive to get in on the action. That’s when the market square truly becomes Hillatori, the Cloudberry Market Square.

When: June through August

Where: Center of Ranua, Hillatori

Organizer: organizations from Ranua
